Cascade Series Maintenance & Use Instructions

- 1. Check that all attachments are secure** three weeks after play set is installed. Continue to check regularly and secure as necessary thereafter.
- 2. Inspect regularly for broken or damaged pieces.**
Splintered surfaces should be sanded smooth to avoid danger of injury. Cracks resulting from weathering are normal; pieces developing those cracks do not need to be replaced. However, pieces with structural damage DO need to be replaced promptly.
- 3. On swing sets with a tire swivel:**
The swivel should be checked and lubricated on a regular basis.
- 4. Staining Instructions:**
A quality water sealer and/or stain can be applied per owner's preference. For best results, apply sealer/stain within a month after play set installation, following instructions on product label. If your play set was purchased with a stain already applied, it should be re-sealed within 2 years with a sealer/stain of your choice. When applying follow-up treatments, always follow instructions on product label.
- 5. Children playing on play sets should be supervised by an adult at all times.**

Cascade Series 5-Year Warranty

All products are guaranteed for **five years** against defects in the manufacturer's workmanship or materials. In addition, treated wood carries its own warranty against decay and termite infestation. No other warranties of merchantability are made by the manufacturer.

The manufacturer's products are not warranted as being suitable for a particular purpose. The suitability of products is for the purchaser to determine. Adult supervision is recommended while play sets are in use.

Sets are designed to be used safely for many years. Upper grades of lumber are selected for manufacturing. Most lumber is dried after treatment and resurfaced with rounded edges for safety, comfort, and ease of maintenance. Metal parts are either rust-proof or plated to resist corrosion. The manufacturer reserves the right to make design and construction changes without notice.

Assembly instructions are included for sets requiring on-site assembly. At least 3 to 5 inches of playground mulch should be installed in play area to increase safety and enjoyment. Exterior paints or stains may be applied to any set.
